

EasyCheck MICR Tester

MICR testing that is
fast, accurate, inexpensive...

Introductory Offer!

\$1,995.00

The EasyCheck is a MICR signal level tester for MICR (magnetic) encoded documents. The small footprint minimizes required desk space and is ideal for testing signal level print in desktop MICR laser printers used in an office environment.

Many banks charge their corporate customers for unreadable checks. Using the EasyCheck, can ensure that documents printed in-house meet magnetic signal level requirements of the banking industry and the Federal Reserve System.

The EasyCheck has a standard parallel printer port able to connect to almost any printer, including a MICR laser printer, to produce a signal level summary report.

- one-touch operation virtually eliminating training
- user-selectable signal level alarm can be set to tighter than bank specifications
- vertical document transport ensures document is properly registered every time
- three levels of document information:
 - **pass** / **fail** indicator light, average signal strength, and the results message
- also acts as a motorized check reader
- three LCD screen selection on:
 - summary message, signal level range, individual character signal level
- Specifications:
 - 9.5" x 6.5" (23.5cm x 15.5 cm)
 - weight: 6 lbs (2.8kgs)
